8-10

September 2025

TOPICS

Nanoparticles as non viral vectors (Gene Therapy)

New genetic materials (saRNA, mRNA modifications)

PNPs (Polymeric Nanoparticles)

LNPs (Lipid Nanoparticles)

Analytical Characterisation

In Vivo models

Application of AI to Nanocarriers Design Drug Delivery & Controlled.

Novel Delivery Systems

Polymer Therapeutics: advanced synthetic process

Polymer functionalization

New Cationic/Ionizable lipids

PEG replacement.

Translational Medicine

Success cases from bench to clinical trials

Clinical Trials outcomes & real-world applications

Toxicology & Safety of Nanotherapies.

Manufacturing & Regulatory

Regulatory of new pharmacological entities

GMP Implementation of nanoparticle and polymer manufacturing.

DRUG DELIVERY & GENE THERAPY

EXPLORE GROUNDBREAKING ADVANCES IN DRUG DELIVERY & GENE THERAPY

- +20** Plenary Talks led by internationally renowned experts, showcasing visionary insights and cutting-edge research.
- +20** Technical Sessions covering the latest advancements in polymer therapeutics, nanocarrier design, and AI-driven innovation.
- +30** Key Opinion Leaders sharing their expertise on toxicology, regulatory challenges, and personalized medicine.
